DIRAC 19.0

Webpage

http://www.diracprogram.org/doku.php

Version

19.0

Build Environment

- Intel Compiler 19.1.2
  - ifort 19.1.2
  - icc 19.1.2
  - icpc 19.1.2
- Intel MKL 2020.0.2
- cmake 3.16.3

Files Required

- DIRAC-19.0-Source.tar.gz
- openmpi-3.1.0.tar.bz2
  - (8-byte integer version; built during the procedure below)
- diff_memcon (see /local/apl/lx/dirac190/patches/diff_memcon)
  - to increase available memory amount

Build Procedure

```
#!/bin/sh

VERSION=19.0
INSTALL_PREFIX=/local/apl/lx/dirac190

# openmpi (8-byte integer)
OMPI_VERSION=3.1.0
OMPI_INSTALL_PREFIX=${INSTALL_PREFIX}/openmpi310_i8

exit 0
```

Test results

List of failed tests: serial version (mpirun -np 1)

- 20 - eomcc
- 65 - eedm_mhyp_ensps_krci
- 73 - bss_energy
- 74 - pam_test
- 129 - operators_mo_mtx_elements
- 131 - spinrot

List of failed tests: parallel version (mpirun -np 8)

- 18 - polprp_ph
- 46 - fscc_restart
- 65 - eedm_mhyp_ensps_krci
- 73 - bss_energy
- 74 - pam_test
- 95 - mp2_srdft_energies (Timeout)
- 111 - lucita_short
- 129 - operators_mo_mtx_elements
- 131 - spinrot

Notes

- Test results are available at /local/apl/lx/dirac190/test_resutls. (The output files for each test are not available.)
- Intel compiler version shows somewhat better performance than GCC one.
- OpenMPI 4.0.2 built failes on 71 - basis_input_scripted test additionally (reason "Timeout"). We thus employ OpenMPI 3.x.
- Test 18 (polprp_ph): Always failed for parallel runs.
- Test 20 (eomcc): Only serial test of int64 build always fails. (Numerical error). This happens both for Intel Compiler and GCC.
- Test 46 (fscc_restart): Always failed for parallel runs.
- Test 65 (eedm_mhyp_ensps_krci): Minor numerical error? Happens regardless of compiler type (intel/gnu).
- Test 73 (bss_energy): Due to the int64 specification?
- Test 74 (pam_test) Unknown error.
- Test 95 (mp2_srdft_energies) It always failed with "Timeout" for a parallel execution.
- Test 111 (lucita_short): Due to int64 specification? This error does not happen for serial run.
- Test 129 (operators_mo_mtx_elements): Another unknown error regardless of compiler type.
- Test 131 (spinrot): Only in case of Intel Compiler, some of values have been swapped.
