## Notes

- passed all the tests.
- d3q is not enabled (compilation error)
  - (it maybe possible to compile by loading rand() function correctly.)
- intel2020 failed as in [the previous \(6.7\) case](#).
- gfortran doesn't work well.
  - binaries built with versions 6, 8 didn't work
  - binaries built with ver 9, 10 failed on some of tests
    - other versions were not tested.
