

## NAMD 3.0b6 - SMP(single node)+CUDA

### Webpage

<http://www.ks.uiuc.edu/Research/namd/>

### Version

3.0b6

### Build Procedure

- GCC 12.1.1 (gcc-toolset-12)
- Intel MKL 2024.0
- CUDA 12.2 Update 2

### Files Required

- NAMD\_3.0b6\_Source.tar.gz
  - tcl, tcl-threaded are obtained from <http://www.ks.uiuc.edu/Research/namd/libraries>
  - MKL was used for FFTW

### Build Procedure

```
#!/bin/sh

VERSION=3.0b6
CHARM_VERSION=7.0.0

```

## Notes

- Multi-nodes runs are not available.
  - You can use multiple GPUs on a node.
- Basic functions (such as minimize, md) are supported in this version.
  - (In [3.0b2 article](#), we once wrote "minimize is not available for GPU". But that description was completely wrong; 3.0b2 supports minimization. We apologize for publishing the incorrect description. (3.0 b2 article was fixed.) We were not aware of functionality updates from the 3.0 alpha version.)
